**Role type:** Full-time

**Location:** Bangalore

**Contract:** 2 years

**Salary:** Best based on Experience

**Application Deadline:** December 21, 2021

**Role Commencement:** January 17, 2022

## **About the Museum of Art & Photography**

The Museum of Art & Photography (MAP) is a bold, dynamic and ambitious project committed to building and sustaining a new museum of international standards in South India. Its mission is to exhibit, interpret and preserve a growing collection of art and cultural artefacts, motivated by a belief that museums can play a positive role in society.

MAP is the custodian to a growing collection of over 18,000 art works, predominantly from the Indian subcontinent and dating from the 12th century to the present. Its flagship site will include five galleries, an auditorium, an art and research library, education centre, a multimedia centre and a specialised research and conservation facility. From here, MAP will produce exhibitions, encourage and foster new academic research and improve access and understanding for the visual arts in India, with a key focus on inclusively building new audiences.

While the museum's physical space is being built, MAP is carrying out its mission by actively reaching out to the local community, in particular to schools in Bengaluru, through a variety of programs and projects, including artist loans, art exhibitions, workshops and lectures. MAP's long-term strategy is to be a sustainable and scalable model and catalyst for further positive change in the museum sector in India, through capacity building and knowledge-sharing.

## **Role Overview**

The web project manager key role in the continual development of MAP's websites development strategy. Working with various stakeholders and a solution provider's

delivery team, he/she will articulate project objectives to team members and assist with ground-level project execution.

This role will possess a deep knowledge of the range and capabilities of modern web technologies, together with strong project management skills gained in an agile, digital environment and good interpersonal & communications skills.

The Project Manager acts as liaison between client stakeholders (and their specific project objectives) and the internal MAP team delivering against those objectives. The Project Manager thrives in the role of project SME—being the deep owner of all requirements with the ability to provide detail and status on any project item.

### **Responsibilities**

- Define, maintain, and drive project estimates, scope, and corresponding deliverables.
- A success-focused mindset and willingness to creatively problem solve
- Ability to effectively organize and prioritize tasks in a fast-paced environment
- Experience successfully scoping and estimating development schedules, dependencies, and resource allocations.
- Proven ability to facilitate meetings with a variety of participants including customers and engineers.
- Experience working with non-technical teams.
- Great interpersonal/organizational skills, with the ability to perform as a team member.
- Work to remove any impediments that obstruct the team's pursuit of its sprint goals.
- Provide status reports on project schedule, scope, and budget.

### **Required competencies**

- Bachelor's degree in a related field or equivalent experience
- Knowledge of specific IT project management and SDLC delivery methodologies

- 7+ years of industry experience as a project manager within a technology environment, with a record of successfully delivering complex products and services.
- 4+ years of web application development project management with understanding of Agile and traditional software development methodologies.
- Experience in communicating with clients in various ways
- Knowledge about the development and design of online sites
- Good knowledge of programming language like JAVA, HTML, PHP, CSS and hosting setup is a plus
- Demonstrated experience with WordPress required
- Prior experience as a web designer and/or WordPress full-stack developer desired
- Understanding of SEO and digital marketing concepts and strategy
- Good knowledge of easy content management integration
- Experience with Photoshop, xD, HubSpot, Google Workspace, and Teamwork is a plus
- Clear understanding of web application development principals and basic architecture.
- Good understanding of databases (SQL Server), middle-tier framework (.NET), and single-page web applications (newer JavaScript Frameworks).
- Knowledge of triage process and issue tracking, preferably using JIRA.
- Ability to design, develop, upgrade, and maintain web projects
- Good knowledge of search engine optimization and traffic generation strategies for websites
- Prior experience / museum knowledge preferred.

### **Equality & Diversity**

MAP is an equal opportunities employer. It opposes all forms of discrimination and believes that all people, regardless of their identity or membership of any group deserve to be treated equally, consistently and fairly. MAP welcomes creativity, excellence and different perspectives that individuals of all backgrounds and abilities bring to our work.
