About MAP

The Museum of Art & Photography (MAP) is one of India's first major museums of South Asian visual culture. The museum is housed in a state-of-the-art, 44,000 square foot building, designed by the acclaimed Indian architectural practice Matthew & Ghosh, on a landmark site at the heart of Bengaluru's museum district. MAP's five-story building on Kasturba Road includes multiple galleries where the collection is displayed, an auditorium, an art and research library, an education centre, a specialised research and conservation facility, as well as a café.

MAP's collection includes more than 1000,000 works predominantly from South Asian: Modern and contemporary art, living traditions, textiles, craft and design, pop culture, pre modern art and photography, dating from the tenth century to contemporary times.

Our mission is to harness the transformative potential of art, to enrich lives, ignite creativity, and connect people. We make art accessible and engaging for everyone through innovative experiences, meaningful dialogue and building communities.

With a focus on accessibility for people with disabilities, and technological tools to make the museum relevant and exciting, MAP ensures a holistic experience for visitors of all ages.

Having launched online in December 2020, at the height of the pandemic, as India's only digital-first museum, and then physically in February 2023, MAP has been bringing its collection to life through multiple pathways, from online exhibitions to a range of articles and essays, collaborations with museums around the world, engaging talks by leading industry figures, and educational resources for kids and adults.

Position Summary:

We are seeking a versatile Frontend Developer with strong UI/UX skills and exposure to full-stack development. The ideal candidate will design, develop, test, and maintain web applications, ensuring seamless user experiences and robust performance.

Key Responsibilities:

1. Understand project requirements and translate them into intuitive UI/UX designs using Figma and Adobe XD.
2. Develop responsive, scalable frontend applications using HTML, CSS, JavaScript, Angular, Next.js, and Node.js.
3. Collaborate with backend teams and integrate APIs; possess a basic understanding of Laravel.
4. Work with databases including MySQL, MongoDB, and CouchDB.
5. Conduct testing, deployment, and performance optimization of applications.
6. Manage version control using Git/GitHub.
7. Support basic AWS infrastructure setup and maintenance.
8. Handle domain and hosting management (GoDaddy, Wix).
9. Administer and maintain Shopify websites.
10. Integrate and manage third-party services as needed.

Requirements:

1. Strong grasp of frontend technologies with a creative eye for design.
2. Hands-on experience with modern frameworks and tools.
3. Familiarity with cloud services, hosting, and deployment.
4. Problem-solving skills with the ability to work independently and in a team.
5. Nice to Have:
6. Experience in performance tuning and cross-browser optimization.
7. Knowledge of other CMS or e-commerce platforms.

Equality & Diversity

MAP is an equal opportunities employer. We oppose all forms of discrimination and believe that all people, regardless of their identity or membership of any group deserve to be treated equally, consistently and fairly.

We welcome creativity, excellence and different perspectives that individuals of all backgrounds and abilities bring to our work.
