About MAP

The Museum of Art & Photography (MAP) is one of India's first major museums of South Asian visual culture. The museum is housed in a state-of-the-art, 44,000 square foot building, designed by the acclaimed Indian architectural practice Matthew & Ghosh, on a landmark site at the heart of Bengaluru's museum district. MAP's five-story building on Kasturba Road includes multiple galleries where the collection is displayed, an auditorium, an art and research library, an education centre, a specialised research and conservation facility, as well as a café.

MAP's collection includes more than 1000,000 works predominantly from South Asian: Modern and contemporary art, living traditions, textiles, craft and design, pop culture, pre modern art and photography, dating from the tenth century to contemporary times.

Our mission is to harness the transformative potential of art, to enrich lives, ignite creativity, and connect people. We make art accessible and engaging for everyone through innovative experiences, meaningful dialogue and building communities.

With a focus on accessibility for people with disabilities, and technological tools to make the museum relevant and exciting, MAP ensures a holistic experience for visitors of all ages.

Having launched online in December 2020, at the height of the pandemic, as India's only digital-first museum, and then physically in February 2023, MAP has been bringing its collection to life through multiple pathways, from online exhibitions to a range of articles and essays, collaborations with museums around the world, engaging talks by leading industry figures, and educational resources for kids and adults.

About the Role:

We are seeking a skilled Laravel Developer with a strong foundation in backend development and a working knowledge of frontend technologies. The ideal candidate will be responsible for designing, developing, testing, and maintaining web applications with a focus on Laravel while ensuring seamless user experiences and robust performance.

Key Responsibilities:

1. Understand project requirements and translate them into scalable, maintainable code using Laravel.
2. Develop and maintain backend logic, RESTful APIs, and database structures.
3. Work with databases including MySQL (primary), MongoDB, and CouchDB.
4. Collaborate with frontend developers to integrate APIs and deliver complete solutions.
5. Build responsive UIs using HTML, CSS, JavaScript, and exposure to frameworks like Angular or Next.js is a plus.
6. Conduct testing, deployment, and performance optimization of applications.
7. Manage version control using Git/GitHub.
8. Support basic AWS infrastructure setup and maintenance.
9. Handle domain and hosting management (GoDaddy, Wix) as needed.
10. Administer and maintain Shopify websites and integrate third-party services when required.

Requirements:

1. Strong expertise in Laravel framework (minimum 1–2 years of hands-on experience).
2. Proficiency in PHP, MySQL, and API integrations.
3. Familiarity with frontend technologies (HTML, CSS, JavaScript).
4. Experience with cloud services, hosting, and deployment.
5. Problem-solving skills with the ability to work independently and in a team.

Nice to Have:

1. Exposure to UI/UX tools like Figma or Adobe XD.
2. Knowledge of Next.js, Angular, or Node.js.
3. Experience in performance tuning and cross-browser optimization.
4. Familiarity with other CMS or e-commerce platforms.
